Solidarity Letter

Dear Colleagues,

We received the information from OS KOVO headquarter about the situation at Nexen Tire where negotiations with the local management did not reach an agreement, therefore you announced an indefinite strike.

On behalf of the members of VASAS, Hungarian Metalworkers' Federation I express my solidarity with you. We fully understand and support your collective decision to go on strike, as the employer for a long time did not consider it important enough to conclude a collective agreement with you.

Your struggle to improve the living conditions and avoid a fall in real wages of your members is very well justified. In times like these, when prices of food, energy and service are going up sharply it is especially time for employers to show the same level of loyalty towards their workers that the latter have shown day by day at work. It is time that you get the fair share from the value you create!

We support your strike and any other necessary actions you have to take to reach your goals. We are sure that you will act in unity and in solidarity toward each other, and this way you can only win.

We are on your side!

In solidarity,

Spieglné dr. Balogh Livia

VASAS President
