Support strike of metalworkers of Nexen Tire

Dear colleagues

As the representative confederal body of Trade Unions and workers in Switzerland we would like to express our solidarity for the workers from Nexen Tire.

It is a scandal that the management of Nexen Tire refuses collective bargaining leading to a collective agreement.

In the face of such adversity and disrespect shown by the management, the workers have no other choice but to protest and go on strike. Why should they be humiliated and endure hardship when the company has received government incentives and they have been making profits? Inflation is high and the workers should pay the price alone?

It is a scandal and we hope the workers will be able to bring the management to reason and the management shows respect for the very people working for them. The basic rule is to accept collective bargaining. How can the refusal to do so be justified? There is no acceptable answer to this question.

We wish you perseverance and success with your fight for social justice.

Yours sincerely

SWISS TRADE UNION CONFEDERATION
